SUMMARY

- Skilled Frontend Developer with expertise in crafting web experiences using HTML, CSS, JavaScript, and ReactJS.
- Boosted website load performance by 20% by actively transitioning from jQuery AJAX to axios for request handling.
- Proficient in RESTful API integration using Axios and rigorous testing of API endpoints, response times, data validation, and error handling with Jest.
- As a Freelance Frontend developer, engineered a Marketing Data Collection platform leveraging ReactJS and Firebase.
- Deep commitment to upholding top-tier code quality and driving efficient web project development.

SKILLS

| **(Web) Languages -** (JavaScript, HTML, CSS, Typescript, Java) | **Database -** (Firebase) | **Version control -** (Git) |

| **Libraries/Framework -** (ReactJS, NextJs, Tailwind CSS, Redux, Redux Tookit) | **Tool -** (Selenium) |

| **Project Management -** (Azure Devops) | **Others -** (REST API) |

WORK EXPERIENCE

Freelance Frontend Developer 🔗   07/2023 – Present

- Built a robust Marketing Data Collection Web Application using ReactJS, React Router, CSS3, and Firebase Realtime DB, following web development best practices for a client
- Developed an intuitive form for data entry using controlled components in React, created a dedicated interface for CRUD (Create, Read, Update, Delete) operations on data and implemented a "Today's Call" feature for prioritizing daily follow-up activities.

Senior Analyst, *Capgemini India Pvt. Ltd*   01/2021 – 06/2023 │ Pune, India

- Collaborated with cross-functional teams to design and implement user-friendly web interfaces using HTML, CSS, JavaScript
- Utilized modern frontend library ReactJS to develop interactive user interfaces.
- Boosted website load performance by 20% by actively transitioning from jQuery AJAX to axios for request handling.
- Contributed to the development of reusable code components, enhancing the efficiency of future projects.
- Worked closely with backend teams to integrate RESTful APIs, ensuring seamless data flow and functionality.
- Leveraged Selenium for smoke, integration tests, cutting manual tasks by 60%, and speeding up releases.
- Actively participated in code reviews, ensuring adherence to best practices and maintaining code quality.

PROJECTS

HREF Social, *ReactJS, Javascript, Tailwind CSS, Redux, Redux Toolkit, React Hook Form, MongoDB Atlas Realm* 🔗

- A web application that allows users to create personalized link pages with their various social media profiles and websites.
- Leveraged Redux middleware for superior async state control in React.
- Efficient form handling with react-hook-form for username, image URL, and social media links input.
- Implemented dynamic URL generation using React Router, allowing users to have a unique profile link.
- Secure profile edits via unique security key validation using react-hash.

Portfolio site, *Nextjs, Tailwind CSS, Typescript* 🔗

- Built using Next.js, a powerful JavaScript framework, and Tailwind CSS, a utility-first CSS framework.
- Features a resume section for direct download/view, an 'About Me' section detailing my professional journey, a 'Contact' section for direct communication, and a 'Projects' section showcasing my skills and experiences.

EDUCATION

Bachelor's degree: Information Technology,   2016 – 2020 │ Anand, India
G.H Patel College of Engineering & Technology

COURSES

Agile Software Development, *Coursera*   04/2021

AWARDS

STAR Award, *Capgemini India Pvt. Ltd*   06/2022

Innovation Award, *Capgemini India Pvt. Ltd*   03/2022
